STAFF REPORT**

MEETING DATE: 05/06/2025

SUBJECT: Presentation on the proposed FY 25-26 Town of Carefree, Arizona Utilities Community Facilities District (Carefree UCFD) budget (informational only).

PREPARED BY: Greg Crossman, Carefree Water Company Manager

SUMMARY:

Attached for your review prior to the May 6, 2025, Board meeting is the proposed Carefree UCFD budget for FY 25-26.

With the substantial completion of the Carefree Water Consolidation Project (WCP), the FY 25-26 UCFD budget primarily focuses on our Debt Service repayment obligations and infrastructure enhancements to be constructed within the boundaries of the original Carefree Water Company service area.

These infrastructure enhancements are associated with two projects; the Peaceful Place Booster Pump Station Improvement Project and the Silver Saddle Gravity Zone Improvement Project. Both projects have substantial benefits within the original Carefree Water Company service area and benefits in the acquisition areas. The Peaceful Place Booster Pump Station Improvement Project is currently under construction with an anticipated completion date near the end of summer 2025. A Federal Community Grant of \$800,000 from the Environmental Protection Agency has been awarded to the Carefree UCFD to facilitate the construction of the Silver Saddle Gravity Zone Improvement Project.

Please contact Greg Crossman (480-488-9100; greg@carefreewaterco.com) with any questions.

STAFF REPORT**

MEETING DATE: 05/06/2025

SUBJECT: Presentation on the proposed FY 25-26 Carefree Water Company budget, rates, fees, and charges (informational only).

PREPARED BY: Greg Crossman, Carefree Water Company Manager

SUMMARY:

Attached for your review prior to the May 6, 2025, Board meeting are proposed Carefree Water Company budget and water rate documents for FY 25-26. The Water Company's fiscal year coincides with the Town's and runs from July 1, 2025, through June 30, 2026.

The proposed water rate increase for FY 25-26 is 4.4% which is consistent with the 5-Year Rate Plan recommended by Willdan Financial Consultants and approved in 2021. FY 25-26 is the last year of the 5-year plan. This increase applies to both the monthly base fee and the commodity rates and results in an increase in the average residential customer's water bill of \$5.69 per month. This figure is based on an average residential water use of 12,000 gallons per month.

The Water Company's revenues for FY 25-26 are anticipated to be \$5.2 million, an increase from last year's budget of \$200,000.

The following is a summary of major expense indicators for this year's budget:

- APS Power -- 6% increase
- CAP Water (Untreated) --14% increase (due to shortage conditions on the Colorado River)
- Scottsdale Water (Treated) -- 5% increase
- General and Administrative Costs -- 9% increase (includes new regulatory expenditures)
- Replacement and Maintenance Costs -- 4% increase

OTHER CONSIDERATIONS - FEES, CHARGES, AND DEPOSITS

The FY 25-26 proposal also includes the following updates to fees, charges, and deposits:

- Standpipe (Fill Station) and Fire Hydrant Meter Rates are being adjusted to align with the market conditions and the cost of doing business.
- Updated Water Supply Fee -- Carefree's Water Supply Fee for new development was initially approved in FY 22-23. The fee was updated for FY 24-25 to reflect rapidly changing costs in the water supply market. Again, under this year's budget, updates to the Water Supply Fee are being proposed to reflect current cost information for existing and future water supplies and resources.

BUDGET AND RATES DETAILS

Included in this packet are the following FY 25-26 documents:

- Water Rates Summary and Spreadsheets (pages 2-5)
- Profit and Loss Summary and Spreadsheet (pages 6-7)
- Cost of Water Summary and Spreadsheet (pages 8-9)
- General and Administrative Budget Summary and Spreadsheet (pages 10-14)
- Replacement and Maintenance Budget Summary and Spreadsheet (pages 15-17)
- Reserve Recommendations (page 18)

Replacement and Maintenance (R&M) Summary

Carefree Water Company – FY 25-26

- Funds the normal water system maintenance (items we do everyday)
- Unscheduled repair/replacement costs are the hardest to predict
- Utilized historical expenses from the last 3 years, plus knowledge of what needs to be done
- Budget is up 4% this fiscal year, \$13,500, reflecting:
 - Additional R&M in for expanded service area
 - Material/Contract Labor/Equipment Rental Increases
 - Supply-Chain Related Issues Have Improved

AWWA Recommendation¹: 45-90 days

Use a 60 day (2 month) Operating Reserve

FY 23-24 Operating Budget: \$3.0 M

$(\$3.0 \text{ M}/12 \text{ months}) \times 2 \text{ months} = \$500,000$

Repair and Replacement Reserves

AWWA Recommendation¹: 1% – 2% of Original Asset Value

Use 1% of Original Asset Value

Original Asset Value = \$30.9 M

$\$30.9 \text{ M} \times 1.0\% = \$309,000$

Contingency

AWWA Recommendation¹: Open

Use a Conservative Approach in Other Categories and Defer Additional Contingency

Debt Reserves

AWWA Recommendation¹: 120% of Annual Debt Service

Base Fee in Rates Essentially Pays Annual Debt Service

Use 50% of Annual Series 2021 Bond Debt Service for Reserves

Annual Debt Service = \$1.1M

$\$1.1\text{M} \times 50\% = \$550,000$

Total Target Reserves: $\$500,000 + \$309,000 + \$0 + \$550,000 = \$1,359,000 \rightarrow$ Use \$1.4M

Water Supply Fee

Carefree Water Company – FY 25-26 Update

PURPOSE

This report presents recommendations to update the one-time “Water Supply Fee” for new development and redevelopment projects within the service area of the Carefree Water Company. This fee was originally approved in FY 22-23. The purpose of the Water Supply Fee is two-fold:

- 1) Collect from new development and redevelopment projects their reasonable share of costs already expended for securing water supplies and water rights.
- 2) Provide the Water Company one mechanism to facilitate and fund the acquisition of new water supplies to bolster Carefree’s water portfolio.

BACKGROUND AND HISTORY

A significant amount of planning and capital expenditures have been committed to assure that Carefree has an adequate supply of water into the future. Our existing customer base has fully paid for these efforts.

The current drought situation within the western United States and particularly the desert southwest has highlighted the fact that our water supplies and water rights are limited resources. These resources are likely to be curtailed in times of drought.

In order for Carefree to have an adequate supply of water into the future, we must manage and plan our finite water resources today and balance those resources with the need for reasonable growth, redevelopment, and revitalization.

CURRENT SUPPLY SITUATION

The Carefree Water Company has secured the following water supplies which will be used as shown below in the Water Supply Fee calculation:

Water Supply	Year Obtained	Amount Used in Fee Calculation [Acre Feet (AF)/yr]
CAP M&I (Original Allocation)	1990	400
CAP M&I (BHP Reallocation)	2001	900
CAP NIA (60% Availability Assumed)	2021	67 (112 x 0.6)
CAP M&I (Cave Creek Transfer)	2023	378
Groundwater	Grandfathered	500*
Total		2245

* Annual groundwater pumping shown (500 AF) is the maximum non-emergency groundwater volume established in the Scottsdale Treatment and Transportation Agreement. The only other legal limitation is Carefree’s historic groundwater pumping capability.

Carefree has obtained various CAP water rights over its history as detailed in the table above. The Carefree Water Company also has the right to pump groundwater within the Carefree Subbasin which is part of the East Salt River Valley aquifer. Although we exercise this right every year, the Arizona Department of Water Resources does not consider this groundwater resource as an “assured supply” that is continually available for the next 100-years and therefore we cannot utilize our groundwater resources to support new subdivision development within the Carefree community. Subdivision development is regulated by the ADWR and must obtain a “Certificate of Assured Water Supply” in order to be approved for development. Recent dealings with ADWR have indicated that currently only Carefree’s CAP M&I allocations can be utilized to demonstrate water availability to meet our existing demand and future demand for assured water supply purposes.

FUTURE SUPPLY SITUATION

The original Water Supply Fee calculations performed for FY 22-23 used simplifying assumptions in order to generate a reasonable Water Supply Fee until additional details on the amount and cost of future supplies were obtained. These original assumptions were conservatively low in order to not inflate the initial Water Supply Fee. This Water Supply Fee update contains more clarity on the cost of future water supplies, even though there are still cost uncertainties.

The future water supply assumption for this analysis continues to be new Bartlett Dam water rights. This new Bartlett Dam water would only be used to “firm”, or back-up, Carefree’s current CAP supply and/or reduce our groundwater pumping. Thus, new Bartlett Dam water is not considered an additional water supply even though 1,155 AF of storage behind new Bartlett Dam would result in an average of yield of 330 AF of water annually.

For Carefree, new Bartlett Dam water would be delivered to the CAP canal through the future Salt River/CAP Interconnection Facility (SCIF), allowing delivery of this water to one of our neighboring communities that we have Treatment and Transportation Agreements with (Scottsdale and Cave Creek). This still appears to be a the most likely future water resource from a cost and viability perspective.

WATER SUPPLY FEE

Appendix A contains the methodology and calculation for a Water Supply Fee update to \$5,379/AF. The Policy Statements below provides guidance on how this fee will be applied.

POLICY STATEMENTS AND ADMINISTRATIVE GUIDANCE

- 1) All single-family residential units (SFRs) are assumed to require 0.5 AF/yr of water supply/water rights, setting the Water Supply Fee at \$2,690 per SFR dwelling unit.
- 2) All multi-family residential units (MFRs) are assumed to require 0.25 AF/yr of water supply/water rights, setting the Water Supply Fee at \$1,345 per MFR dwelling unit.
- 3) The Water Supply Fee for all other future water uses (commercial, irrigation, subdivision common areas including pools and recreational facilities, etc.) shall utilize the fee amount of \$5,379/AF multiplied by a calculated annual water demand. The calculated annual water demand shall be reviewed and approved by the Carefree Water Company. Carefree Water Company staff shall develop and implement future policies and procedures for the calculation of annual water demand calculations to ensure consistency and reasonableness.
- 4) Any future water use and proposed project that has an annual water demand greater than 15 AF is deemed to have a significant impact on Carefree’s existing water resources and may be required to provide a viable source of water that is physically available to the Carefree Water Company in lieu of payment of the Water Supply Fee. Proposed projects meeting this criterion will be reviewed on a case-by-case basis in consultation with the Town of Carefree considering the nature of the development, the volume of annual water needed, and best interest of the Town of Carefree and Carefree Water Company.
- 5) It is the intent of this policy to protect the Carefree/Cave Creek Groundwater Subbasin and to that extent, any water resource that would require direct or indirect use of groundwater within the Subbasin would not qualify as a viable source of water.
- 6) Redevelopment/revitalization projects shall qualify for a reasonable “credit” for existing annual water demand based on historic water use at a property. This historic annual water use shall be reviewed and approved by the Carefree Water Company and is exempt from the Water Supply Fee. The Water Supply Fee does apply to all newly generated annual water demand.
- 7) Rebuilding/refurbishing existing SFRs and MFRs are exempt from Water Supply Fees as long as the usage on the property remains SFR or MFR, even if characteristics change (i.e. total square footage changes, number of water fixtures changes, etc.).
- 8) Any land division that generates a new developable lot will require a Water Supply Fee at the time of development.
- 9) Water Supply Fees can be included/acknowledged in negotiated Development Agreements.
- 10) Water Supply Fees cannot be “prepaid”. Water supply Fees may only be paid at the time of development/redevelopment permit issuance.
- 11) Water Supply Fees once paid, are non-refundable.

APPENDIX A VALUE/COST OF CURRENT AND FUTURE WATER SUPPLIES

Original CAP M&I Allocation and Cave Creek Transfer – 778 AF

Basis of water supply valuation

- CAP M&I Capital Charges (paid regardless of water usage) – 1993 thru 2024
 - Assumed Time Value of Money - 5%
 - 2024 Per AF Value - \$2,390.11/AF
 - Total 2024 Value of Water Rights (778 AF x \$2,390.11/AF) = \$1,859,505.58

Supplemental CAP M&I Allocation (BHP Copper) – 900 AF

Basis of water supply valuation

- Upfront Cost - \$329,389.15
 - Assumed Time Value of Money - 5% (2001 thru 2024)
 - 2024 Value - \$1,011,726.60
- CAP M&I Capital Charges (paid regardless of water usage) – 2001 thru 2024
 - Time Value of Money - 5%
 - 2024 Per AF Value - \$1,172.81/AF
 - 2024 Value - \$1,055,529.00
- Total 2024 Value of Water Rights = \$1,011,726.60 + \$1,055,529.00 = \$2,067,255.60

Supplemental CAP NIA Allocation – (60% Availability = 112 AF x 0.6 = 67 AF)

Basis of water supply valuation

- Upfront Cost - \$219,688.00

Groundwater – (500 AF)

- Upfront Capital Cost - \$0

Future Allocations – New Bartlett Dam Water & Salt River/CAP Interconnect Facility (SCIF) - 200 AF**

Basis of water supply valuation

- New Bartlett Dam Water Estimate - \$6,930,000.00 (\$9,900/AF of capacity)
- SCIF Estimate = \$1,000,000.00
- Total = \$11,434,500.00/AF + \$1,000,000.00 = \$7,930,000.00

** Assumes a New Bartlett Dam long-term average storage yield of 200 AF/yr of water supply from a Bartlett Dam storage capacity of 700 AF. This water will only be used to “firm”, or back-up existing supplies and/or reduce groundwater pumping, therefore, no new water supplies are assumed to be generated from participation in the new Bartlett Dam project.

Cost Allocation – Future Development and Redevelopment

Assumptions

- A cost for all current and anticipated water supplies will be calculated and weighted on a per acre-foot basis considering all water supplies reasonably available to Carefree.
- Future development’s and redevelopment’s share of these water supply costs will be based on this weighted per acre-foot calculation.

Calculation

CAP Allocation – Original & CC Transfer	\$ 1,859,505.58
CAP Allocation – BHP Copper	\$ 2,067,255.60
CAP Allocation – NIA Water	\$ 219,688.00
Groundwater	\$ 0.00
Bartlett & SCIF	\$ 7,930,000.00
TOTAL	\$12,076,449.18/2245AF = \$5,379/AF
